Summary:

RealPage is looking to add a Senior Developer to our team in Colombia! As a Senior Developer with Full Stack experience you will have a great opportunity to design and build new applications while learning also from legacy applications, learn and use new technologies that are fit to product's need, and most of all will be able to work with awesome people and great management team.

Responsibilities:

What you will be doing:

- Design: plan the architecture and design for new features
- Develop: write code for new features, and enhance existing features
- Test: write unit tests for your code
- Grow: learn new tools and techniques
- Replace: rewrite and refactor outdated code
- Mentor other developers

Tech stack:

- Various front ends migrating to React
- Service-oriented C# (.NET, MVC, .Net Core) application layer
- Microsoft SQL database, SSIS
- Working knowledge of SOAP and REST

Skills/Qualifications:

6+ years software development experience

We don't require experience with specific tools because great engineers can learn new tools.
